

## Stackable emergency stretcher h687\_37

Stackable field rescue stretcher. Equipped with 4 support feet. Capacity: 170 kg.

**Stackable stretcher** ideal for lifting and transporting injured persons, also suitable for stationing in field rescue conditions. Its **structure** is extremely **lightweight and resistant**, made of **steel** with a **PVC sheet, easy to sanitize**. Equipped with **4 support feet** that make the structure highly **stable**. The **grip** of the stretcher is **facilitated** by the small dimensions of the tubular frame, which make it easier to lift and transport during transfer phases.

### Technical features:

- Open length:  $1885 \pm 10$  mm
- Width:  $480 \pm 5$  mm
- Height:  $175 \pm 10$  mm
- Weight:  $6 \pm 0.5$  kg
- Capacity: 170 kg
- Structure construction materials: Al, Steel
- Sheet material: PVC
- Grip points: 8
- Number of support feet: 4
- Stackable
- Class I Medical Device compliant with EU Reg. 2017/745
