

Stackable kindergarten cot h364_53

Stackable kindergarten cot in birch plywood (126x66x30 cm). Non-toxic structure with rounded edges and breathable perforated bottom.

The **kindergarten cot** is a furnishing solution specifically designed to meet the collective rest needs within nursery schools, daycares, and playrooms. The structure is made of **birch plywood**, a material chosen for its high dimensional stability and mechanical resistance. The natural finish, obtained using **non-toxic water-soluble paints**, ensures maximum safety for children, leaving the wood grain visible for a harmonious aesthetic impact in educational environments. The design prioritizes passive safety thanks to **rounded corners and edges**, eliminating potential danger points in case of accidental impacts.

Technical features

- **Frame material:** high-resistance birch plywood
- **Safety:** fully rounded corners and edges
- **Finish:** natural with non-toxic water-based paints
- **Fire reaction:** class 2 fire retardant certified
- **Ventilation:** bottom with integrated holes to promote mattress aeration
- **Space optimization:** fully stackable structure
- **Dimensions:** W. 126 x D. 66 x H. 30 cm
- **Warranty:** 5 years

Please note: The cot does not include the mattress.
