

Stackable New Jersey barrier h632_01

New Jersey road barrier in plastic material. Dimensions: L100 x 40 x H70 cm.

New Jersey road barrier, ideal for delimiting vehicle traffic on roads, highways and parking lots; can also be used inside construction site areas to delimit construction spaces. Made of **plastic material** to ensure lightness, ease of transport, safety and resistance in case of impact. Furthermore, being **stackable**, it allows for a 50% volume reduction with a consequent **reduction in transport costs** and storage practicality. Equipped with a setup for the insertion of poles for vertical signage and complete with a **fastening system** (male-female) that allows for creating different configurations based on needs. Designed to be moved also with forklifts and filled with ballast or water for a ballasted weight of 30 kg.

Technical features:

- Dimensions: L100 x 40 x H70 cm
- Material: plastic
- Stackable
- Available in white or red

INFORMATION

- **Typology** Doppia scarpa
- **Material** Materiale plastico
- **Length in millimetres** 1000.000000
