

Stackable school chair h172_256

School chair h172_256 in polypropylene and Ø25 mm tubular frame. Stackable, with anti-noise tips and various colors. Dimensions: 36 x 36 x h 43 cm.

The **Stackable school chair h172_256** is a professional seat for collective use developed for setting up school classrooms and educational environments. This furnishing element resolves the operational criticality of noise disturbance caused by the continuous movement of chairs and the clutter during the reorganization and cleaning of spaces. Intended for school managers, purchasing managers for educational institutions and public bodies, the chair features a polypropylene shell available in different colors mounted on a Ø 25 mm tubular structure with continuous wire welded connection bars and specific holes for the shell attachment. The base is equipped with non-removable anti-noise tips that guarantee stability and protection of surfaces. The seat dimensions are W 36 x 36 H 43 cm and its stackable configuration allows for optimal storage when not in use.
