

Stainless steel bin h413_102

110-liter stainless steel bin with pedal lid and front door opening, equipped with wheels and tubular handle. For catering and commercial use.

Waste bin designed for high-frequency professional environments: restaurants, hotels, pizzerias, and shopping centers. Made entirely of **stainless steel**, it guarantees structural solidity and durability over time even in contexts with critical hygiene and health requirements. The **rectangular** shape and the **110-liter** capacity make it suitable for managing substantial volumes of waste without compromising on practicality of use.

The combined opening system—**lid with pedal** and **front door opening**—allows for versatile access: the pedal for quick waste disposal during service, the front door for emptying and internal cleaning. The mobile structure on **wheels** facilitates movement between service areas, while the **handle** and **pedal in tubular stainless steel** complete the functional equipment.

Technical characteristics

- **Capacity:** 110 liters
- **Dimensions:** W. 36 x D. 46 x H. 90 cm
- **Structural material:** stainless steel (body and lid)
- **Accessory components:** handle, pedal and tubular trolley in stainless steel
- **Opening system:** lid with pedal + front door opening
- **Mobility:** equipped with wheels and trolley
- **Shape:** rectangular
