

Stainless steel bin with two compartments h41316

Professional stainless steel bin 2x33L, pedal opening and removable compartments. Hygienic and robust solution for the catering industry.

This professional **stainless steel** bin is designed to meet the rigorous hygiene requirements of the HoReCa sector and industrial kitchens. The vertical design allows for the integration of waste sorting even in environments with limited space, while ensuring orderly and efficient waste management thanks to the **double compartment** system.
