## Stainless steel body stretcher h566\_04

Transport stretcher for bodies in AISI 304 stainless steel, without lid, with removable collection tray and 4 wheels. Dimensions 2070x700x850 mm.

Professional stretcher designed for the safe transport and handling of bodies in mortuary, funeral, and healthcare settings. Constructed entirely of **AISI 304 stainless steel**, it guarantees hygiene, durability, and ease of sanitization. The structure without a lid allows easy access and inspection of the body, while the square section profile base offers stability during movements.

Equipped with a **removable collection tray on slides** for the management of body fluids, integrated into the recessed top surface equipped with a drainage hole. Equipped with 4 wheels, 200 mm diameter (2 braking), for controlled movement on flat surfaces.
