

Stainless steel boot washing machine with 5 irrigated brushes h767_04

Professional stainless steel boot washer with 5 irrigated brushes. Hydraulic operation without electricity for deep hygiene in harsh environments.

This **professional boot washer** represents an indispensable solution to ensure the highest hygienic standards in critical operational contexts. Made entirely of **stainless steel**, the device is designed to resist mechanical wear and corrosion typical of industrial or outdoor environments. The cleaning system acts mechanically via water pressure, eliminating the need for electrical connections and ensuring maximum safety even in wet or explosion-risk areas.

Technical features

- **Material:** High-resistance stainless steel
- **Cleaning system:** 5 irrigated brushes (1 central for the sole and 4 lateral for upper and sides)
- **Power supply:** Exclusively water-based (without use of electricity)
- **Base dimensions:** 400 mm (length) x 400 mm (width)
- **Variable height:** From 500 mm (handle lowered) to 870 mm (handle raised)
- **Operating weight:** 12 kg
- **Flow management:** Integrated by-pass valve for the exclusion of lateral brushes
- **Structure:** Robust self-supporting configuration
