

Stainless steel indoor umbrella stand h770_19

Professional umbrella stand h770_19 in satin stainless steel. Includes a compartment for folding umbrellas and a removable tray. Dimensions 34x35x50 cm.

The **h770_19 professional umbrella stand** represents an advanced solution for managing entrances in high-traffic contexts. Made of **satin stainless steel** with a thickness of 0.8 mm, this structure ensures high corrosion resistance and superior mechanical stability, making it ideal for prestigious offices, hotels, and reception areas. The design focuses on **passive safety** and functionality, integrating rounded and reinforced edges that prevent injuries and improve the structural rigidity of the module.

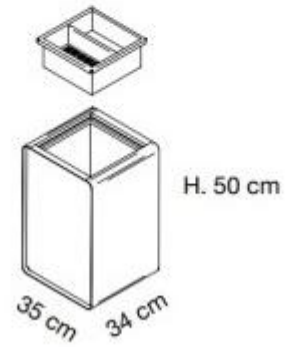

Technical features

- **Material:** Satin stainless steel with a thickness of 0.8 mm.
- **Safety:** Reinforced, rounded side edges protruding by 10 mm; front edges with a 20 mm radius of curvature.
- **Collection system:** Removable drip tray in soft elastomer, with sound-absorbing and shockproof functions.
- **Superior organization:** Satin stainless steel umbrella ring equipped with an anti-extraction safety lock.
- **Ring dimensions:** W 240 x D 240 mm.
- **Dedicated compartment:** Perforated rectangular compartment for folding umbrellas (W 120 x D 240 x H 100 mm).
- **Total dimensions:** W 34 x D 35 x H 50 cm.
