

Stainless steel IV pole h442_11

Professional stainless steel IV pole with 5-star base, adjustable height and 4 safety hooks. Ideal for hospital wards and clinics. Mobile infusion support designed to ensure maximum stability and hygiene within **clinical, hospital environments and home care contexts**. The structure entirely made of **stainless steel** ensures superior corrosion resistance and facilitates deep sanitization operations, fundamental for infection control.

Technical features

- **Structure:** robust tube with 25 mm diameter in stainless steel
- **Support system:** 4 stainless steel hooks with anti-detachment system
- **Load capacity:** 2 kg per single hook
- **Height adjustment:** variable from 1350 to 2150 mm with a friction system that can be operated with one hand
- **Base:** 5-star configuration with 635 mm diameter for an optimal center of gravity
- **Mobility:** 5 twin wheels with 50 mm diameter for smooth sliding
