

Stainless steel IV stand with 4 hooks h740_25

Non-magnetic stainless steel IV pole with 4 safety hooks and 5-spoke base. Stable and resistant, ideal for clinical and home use.

The **non-magnetic IV pole** is an essential medical device designed to ensure maximum reliability in the administration of intravenous therapies. The structure entirely made of **stainless steel** ensures high resistance to corrosion and ease of sanitization indispensable in sterile or high-traffic environments. Thanks to its **non-magnetic** properties, the pole is suitable for use in specific departments where neutrality to magnetic fields is a fundamental operational requirement.

Technical specifications

- **Material:** High quality stainless steel load-bearing structure.
- **Hook configuration:** 4 safety hooks designed to prevent accidental detachment of containers.
- **Base:** 5-spoke stainless steel support for optimal weight distribution.
- **Physical properties:** Non-magnetic structure.
- **Load capacity:** Total maximum load tested up to 12 kg.
- **Stability:** Low center of gravity to minimize the risk of tipping over during movement.
