

## Stainless steel pedal bin h20\_126

Static pedal bin in AISI 430 stainless steel, 70 l, HACCP/CNPP and Rina Services certified for marine and food environments.

Static pedal bin in **AISI 430 stainless steel** with a brilliant finish, designed for environments with high hygienic standards and stringent regulations. The product is certified for marine applications and food contexts, where regulatory compliance and fire safety represent critical requirements.

The design is made with elastic and tubular supports, equipped with **four support points** for stability, while the body is completely **without openings** to prevent the spread of fire. The pedal operation allows for the opening of the container while keeping hands free, a fundamental element in hygienic contexts.

## Technical features

- **Material:** AISI 430 stainless steel
- **Finish:** brilliant
- **Capacity:** 70 liters
