

Stainless steel pedal bin h413_73

30L cylindrical stainless steel bin with pedal lid, galvanized bucket, dimensions Ø32×h.60cm, manual hygienic opening.

The cylindrical stainless steel bin represents a functional and discreet solution for waste management in domestic and professional environments. The **pedal lid** allows for convenient and hygienic opening without direct manual contact, reducing the proliferation of bacteria and bad odors. The **interior is equipped with a galvanized sheet metal bucket**, which significantly facilitates emptying and routine maintenance operations. The essential cylindrical design and polished stainless steel finish allow for harmonious integration into diverse environments, from residential to light commercial contexts.
