

Stainless steel protection post h972_146

Protection post in AISI 304 stainless steel, height 1200 mm and diameter 102 mm. Robust bollard with 3 mm thickness for urban furniture and security.

The **H972_146 protection post** is a technical bollard designed for **urban furniture** and the securing of public spaces. Made entirely of **AISI 304 stainless steel**, this element meets the need to delimit pedestrian areas, parking lots and restricted access points, guaranteeing **superior resistance to corrosion** and atmospheric agents in high-traffic outdoor contexts. The structure with a **tube thickness of 3 mm** offers high mechanical solidity, ideal for the protection of areas subject to potential accidental impacts.

Technical features

- **Material:** AISI 304 stainless steel
- **Total height:** 1200 mm
- **Post diameter:** 102 mm
- **Tube thickness:** 3 mm
- **Installation method:** Direct burial or via ground socket
- **Configuration:** Available in fixed or removable version (with accessory)

Options available on request:

- Class 2 reflective strips for high visibility
- Ground socket to make the post removable
