

Stainless steel refrigerated buffet display case h577_25

Refrigerated buffet display with black EPP insulating base. Dimensions: W 530 x D 330 x H 80 mm.

The **h577_25 refrigerated buffet display case** is a professional display designed for hotels and inns looking for a combination of elegance and high thermal efficiency. The structure is based on a **black EPP (expanded polypropylene) insulating base**, equipped with an ergonomic grip system designed to handle the base without transmitting cold to the operator's fingers. Cooling is guaranteed by an **internal plate equipped with cooling gel** for food, capable of maintaining an optimal temperature of **-12°C**, ideal for preserving dairy products, cheeses, salads, and cold cuts. Completing the equipment is a professional stainless steel tray in Gastronorm GN 1/1 format.

Technical features

- **Materials:** EPP (expanded polypropylene) base and stainless steel tray.
- **Insulating base:** Black color with easy-grip system.
- **Cooling plate:** Dimensions 470 x 265 mm with integrated cooling gel.
