

Stainless steel ring towel holder h218_239

Ring towel holder h218_239 in AISI 304 stainless steel. Concealed wall fixing, ideal for public environments. Dim: 155.3x225.3x70 mm.

The **Stainless steel ring towel holder h218_239** is a professional sanitary accessory developed for the fitting out of high-traffic restrooms. This device solves the operational problem of rapid deterioration of bathroom furnishings and the detachment of accessories due to intensive use, offering a robust and durable structure for the placement and accessibility of towels. Made entirely of AISI 304 stainless steel, the ring ensures high mechanical resistance and maximum surface hygiene. The system is designed with a concealed wall fixing mechanism using the screws included in the supply, eliminating visible elements that could accumulate dirt or be subject to tampering. Suitable for public contexts and environments, the towel holder ensures orderly space management and is available in various finishes.
