

Stainless steel spiral bicycle rack h10923

Stainless steel structure and concrete sides. Available in 5, 7 and 9-space versions. Made in Italy

The **bicycle rack** is an element of urban furniture that allows for **safe parking of bikes**. The **innovative design** and **removable** structure make this bike rack particularly suitable for locations such as city centers and near parks, schools and villages.

For wheel locking, this bike rack consists of a central spiral element. To ensure stability to the structure, the central part is fixed to two lateral **support** walls made of **sandblasted concrete**.

The **stainless steel structure** makes it perfectly resistant to corrosion from atmospheric agents.

To create a parking area for bikes, this product can be positioned both individually or in series.

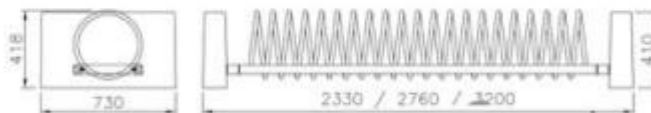

Available in 5, 7 and 9-space models

Technical features:

- Dimensions (W based on the no. of spaces): approx. 2330- 2760- 3200 x 730 x 418 (W x D x H)
