

Stainless steel street furniture bollard h1047_01

Removable street furniture bollard h1047_01 in stainless steel. Post with a 60 mm diameter equipped with automatic locking and a quick removal system via a triangular key (see optional) to unlock emergency passages in pedestrian areas and parking lots. Height: 100 cm above ground.

The **stainless steel street furniture bollard h1047_01** is a professional high-resistance road delimitation and protection device, developed specifically for **municipal administrations, public technical offices, employers, urban interior and exterior designers, traffic managers, and company safety managers**. This complement responds to the organizational need to regulate traffic flows and safeguard public safety, solving the operational problem of **securing access to pedestrian areas, limited traffic zones (ZTL), and corporate or public parking lots, while allowing emergency or service vehicles to pass in case of necessity thanks to a quick opening and disassembly system of the passage**. Structurally, the unit is entirely made of robust stainless steel, a material that guarantees maximum mechanical longevity against impacts and total immunity to weathering and atmospheric corrosion. The post architecture features a fixed external diameter of 60 mm and develops a useful height of 100 cm above ground. Operation is based on an integrated mechanism with automatic closure of the station, while removal and unlocking operations take place using a specific triangular key. The structural stability of the unit on the ground is guaranteed by the positioning of a 35 cm deep lower in-ground socket, included in the module supply.

Technical features

- **Product type:** removable traffic bollard for street furniture with emergency release
- **Code reference:** h1047_01
- **Construction material:** stainless steel
- **External diameter of the post (D):** 60 mm (D60mm)
- **Useful height of the structure:** 100 cm above ground
- **Fixing base specifications (Anchoring):** 35 cm deep lower in-ground socket
- **Integrated locking mechanism:** post with automatic closure system
- **Unlocking and removal mechanics:** quick removal of the metal shaft performable via triangular key (key not included in the package, see optional)
- **Main operational functionality:** allows the quick opening and disassembly of a passage in case of emergency or logistical needs
- **Installation suitability:** outdoor areas, pedestrian accesses, road delimitations, and parking areas

Optional:

- Triangular key
