

Stainless steel surgical sink 1 station 90 cm h624_15

Single-station surgical washbasin in AISI 304 stainless steel (900x565 mm). Seamless monobloc design for maximum clinical hygiene.

The **single-station surgical washbasin** is an advanced technical solution designed specifically for the setup of **operating rooms** and laboratories within hospital facilities and specialized clinics. Manufactured entirely in **AISI 304 stainless steel** with a satin finish, the device complies with the strictest hygiene and safety protocols. The structure is distinguished by the total absence of sharp edges and corners, to protect the operator's safety, and by a **monobloc shaped basin body**, free of joints or visible welds, which guarantees perfect sanitization and the elimination of bacterial accumulation points.

Technical characteristics

- **Total dimensions:** W. 900 x D. 565 x h. 1160 mm
- **Configuration:** Single station for surgical scrub
- **Material:** Satin AISI 304 stainless steel
- **Basin body depth:** 320 mm
- **Construction:** Front wall with basin body formed from a single piece
- **Accessibility:** Removable front panels for routine and extraordinary maintenance
- **Dispensing:** 1 source with photocell activation and integrated mixer
- **Included accessories:** 1 surgical brush holder, 1 photocell soap dispenser (battery powered)
- **Installation:** Wall mounting
- **Hydraulic equipment:** Drain plug and rosette included
