

## Stainless steel surgeon's stool with fireproof padded seat and feet h576\_23

Operator's surgical seat with screw elevation. Fireproof padded seat and base feet. Seat dimensions: Ø 360 x h. 100 mm.

Specific for surgery and the operating room, the **professional 18/10 AISI 304 stainless steel stool** is the ideal equipment for operators during long operations or patient dressings. **Height adjustable** via **screw elevation**, with an **end-of-stroke safety system**, it features a **supporting column** protected by a **casing**, with **telescopic movement**. The base is structured on **5 spokes**, with a circular section, at the end of which there are **safety tips**. Includes base **feet** made of **non-marking polymer**. The **seat** is **padded with fireproof material**, specifically high-density polyurethane, and **upholstered in antistatic fabric**, perfect for use in sterile environments.

### Technical features:

- Dimensions: Ø 540 x h. from 440 to 560 mm
- Adjustable height from 440 to 560 mm
- Structure and base material: 18/10 AISI 304 stainless steel
- Padded seat
- Seat padding material: fireproof high-density polyurethane
- Seat upholstery material: antistatic fabric
- Seat dimensions: Ø 360 x h. 100 mm
- Screw elevation
- End-of-stroke safety system
- Column with protective casing with telescopic movement
- 5-spoke base
- Safety tips
- Non-marking polymer feet
