

Stainless steel tray return trolley h462_09

Professional **stainless steel** single-column tray trolley, designed for the collection and storage of **12 trays**. Ultra-robust structure with oversized tube section, 125 mm wheels with brake and wide 125 mm pitch. Ideal for high-traffic canteens and fast-food outlets.

The **professional stainless steel tray trolley** is the ideal choice for logistics management in canteens, hotels, restaurants and fast-food outlets. Thanks to its reinforced structure with 25x25 mm square tube and 50x25 mm longitudinal crossbars, this model offers exceptional stability and superior resistance to daily mechanical stress, ensuring long life even in conditions of intensive use.

The trolley is extremely versatile: the runners are calibrated to accommodate **12 trays** with a width ranging from **320 to 370 mm**, making it compatible with the most common formats in the sector (GN 1/1 and canteen standards). A strong point is the **125 mm distance between levels**, which allows for easy insertion of trays loaded with bulky dishes or jugs. Maneuverability is ensured by 4 professional 12.5 cm swivel wheels with polyamide caps and ring bumpers to protect furniture.

Technical features

- **Material:** High quality Stainless Steel
- **Structure:** 25x25 mm section tube with 50x25 mm crossbars
- **Capacity:** 12 Trays
- **Tray compatibility:** Width from 320 mm to 370 mm
- **Distance between levels (Pitch):** 125 mm
- **Movement:** 4 swivel wheels Ø 125 mm (2 with parking brake)
- **Wheel components:** Polyamide cap for smooth rotation
- **Protection:** Ring bumpers at the base
- **Total dimensions:** W 510 x D 630 x H 1790 mm
