

Stainless steel tray transport trolley h982_04

Professional "low" tray rack trolley in **AISI 304 18/10 stainless steel**. Compact height of **99 cm**, ideal for fitting under workbenches or in small spaces. Capacity **8 trays/pans** (16 rails), ultra-fast assembly in 5 minutes and Ø 125 mm wheels with brake.

The **h982_04 tray rack trolley** is a compact and extremely versatile solution for logistical organization in professional kitchens, pastry laboratories, and delicatessens. Made entirely of **AISI 304 18/10 stainless steel**, this trolley guarantees the highest hygienic-sanitary standards, resistance to corrosion, and unlimited durability over time, even in high-humidity environments.

With a reduced height of only **990 mm**, the trolley is perfect for being positioned under work tables or for serving as a mobile support station. It features **16 rails** (8 loading levels) with a pitch of 85 mm, optimal for Gastronorm or standard baking trays. One of its main strengths is the **quick assembly** system: the structure is designed to be assembled in just 5 minutes without the aid of complex tools, offering immediate operational flexibility.

Technical specifications
