

Stainless steel tray trolley for 16 GN1/1 trays h2200106

Low double-track tray trolley in stainless steel for 16 GN 1/1 trays (80x60x89 cm). Structure with anti-tip "C" guides, stainless steel top, and bumpers.

The **professional double-track tray trolley** is a robust and versatile solution, designed to optimize work organization in bakeries, pastry shops, canteens, and catering contexts. Made with a solid **square stainless steel tube structure (2x2 cm)**, this trolley solves the problem of intensive storage in spaces with reduced height. The 8+8 configuration allows for the housing of up to **16 GN 1/1 trays** in total safety, thanks to the special **anti-tip "C" stainless steel guides** that prevent containers from accidentally falling during transport. The addition of a stainless steel top surface transforms the equipment into a practical mobile workstation, ideal for preparation phases or as an additional support surface in crowded kitchens.

Technical features

- **Capacity:** 8+8 levels for Gastronorm GN 1/1 trays (total 16 slots)
- **Structure:** 2x2 cm square stainless steel tube
- **Assembly:** bolted crossbars for greater mechanical stability
