

Stainless steel trolley with shelves h956_07

AISI 304 stainless steel trolley with 3 edged shelves, 100x50x96 cm. Non-marking Ø125 mm wheels for hygienic and safe transport in catering.

The **professional trolley h956_07** is designed to meet the needs of intensive handling within industrial kitchens, canteens, hotels, and catering contexts. Made entirely of **AISI 304 stainless steel**, it guarantees exceptional resistance to oxidation and corrosion, making it suitable for food contact and frequent cleaning cycles with chemical agents. The **round tube** structure ensures structural stability even at full load, facilitating the transport of dishes, trays, and heavy equipment.

The three shelves feature a smooth surface and a **40 mm perimeter edge**, a fundamental technical solution to prevent accidental falling of objects during maneuvers. Maneuverability is entrusted to an **ergonomic handle** and four generous swivel wheels, designed to reduce operator effort on every type of professional surface.

Technical features

- **Material:** High hygienic grade AISI 304 stainless steel
- **Configuration:** 3 smooth shelves with 40 mm containment edge
- **Total dimensions:** W 100 x D 50 x H 96 cm
- **Handling system:** 4 non-marking swivel wheels Ø125 mm
- **Safety:** 2 wheels equipped with independent foot brake
- **Structure:** Supporting frame in stainless steel round tube
- **Ergonomics:** Integrated towing handle in the structure
