

Stainless steel umbrella bag dispenser h35802

Design dispenser for wet umbrella bags, in polished stainless steel. Capacity: 400 bags.

The **stainless steel umbrella bag dispenser h35802** is a technical furnishing accessory designed for businesses that place customer care and aesthetics at the heart of their welcome. Made entirely of **polished stainless steel**, this support guarantees superior resistance to corrosion and extreme ease of hygiene. The structure solves the operational problem of wet and slippery floors during rainy days, offering a tidy station where guests can independently collect drip-proof bags. Thanks to its **slim and elegant design**, it integrates harmoniously into high-level professional contexts without taking up excessive space in entrances.
