

Stainless steel veterinary examination table for hospital h938_15

Stainless steel veterinary examination table with phenolic top, water-resistant. Dimensions: W 160 x D 60 x H 85 cm.

The **stainless steel veterinary examination table h938_15** is an essential tool for any veterinary clinic or medical environment that requires high standards of hygiene and practicality. The structure is made entirely of **stainless steel**, a material known for its resistance to corrosion and rust, ensuring long durability even in environments subject to humidity or frequent cleaning operations. The top of the table is coated in **phenolic material**, which offers superior resistance to liquids, facilitating cleaning and preventing damage due to contact with water, chemical substances, or animal fluids. This makes the table perfect for continuous use in healthcare settings, where the speed and simplicity of cleaning are critical factors.

The **disassembleability** of the table represents a great advantage, especially for those who need flexibility in space management or for those who operate in mobile clinics and itinerant veterinary surgeries. Assembly and disassembly are quick and easy, minimizing the time required for preparation. Furthermore, the **feet** allow the table to be adapted to different surfaces, ensuring stability on floors. This means that the table can be used safely in a variety of environments without compromising the safety of the animal under treatment or the medical staff.

The robust design, yet at the same time light and manageable, makes this table a versatile solution, ideal for veterinary clinics, hospitals, and laboratories looking for a reliable and functional product. Its high-quality construction makes it suitable for intensive daily use, maintaining its properties intact even after years of use.

Don't miss the opportunity to improve your clinic with the **stainless steel veterinary examination table h938_15**, perfect for ensuring hygiene, resistance, and practicality.

Buy it now for high-quality and long-lasting service, or **request a personalized quote** for large quantity orders and benefit from exclusive discounts! Make sure to provide the best for your animal patients, choosing state-of-the-art professional equipment.

Technical features:

- **Structure:** Corrosion-resistant stainless steel.
- **Worktop:** Phenolic, water-resistant.
- **Dimensions:** W 160 x D 60 x H 85 cm.
- **Disassemblable:** Simple to transport and install.
- **Feet:** for greater stability.

User benefits:

- Easy cleaning and guaranteed hygiene.
- High resistance to impacts and scratches.
- Quick assembly and disassembly.
- Stable on any surface thanks to the feet.

FAQ:

1. **Is the table easy to assemble?**
Yes, it is designed to be easily disassembled and reassembled.
2. **Does the phenolic top resist liquids?**
Absolutely, it is water-resistant and easy to clean.
3. **Is the table equipped with feet?**
Yes, the table is equipped with feet to ensure stability on surfaces.

Mini buying guide:

Choosing the right **veterinary examination table** is fundamental to ensure efficiency and safety in clinical operations. When purchasing a table, consider the following aspects. Always opt for **stainless steel** structures, as they offer long durability and are easy to keep sanitized. A worktop in **phenolic material** is ideal for resisting liquids and ensuring quick and easy cleaning.

If you need to move the table frequently or operate in environments with limited space, a disassemblable table will be the most practical choice. Check if the table is equipped with **feet** to ensure stability on different surfaces. Evaluate the dimensions of the table based on the spaces available in your clinic and the type of animals you will treat.

Investing in a quality veterinary table is an important step to ensure the comfort of animals and improve the efficiency of medical staff. Make sure to choose a product that offers durability, ease of use, and maintenance, such as the **stainless steel veterinary examination table** with a phenolic top.
