

Stainless steel veterinary table h930_73

Stainless steel veterinary table with adjustable electric height. Dimensions: L 142 x D 66 x H from 87 to 123 cm.

The **veterinary table H930_73** is a professional model made **entirely of stainless steel**, designed to ensure **maximum hygiene, robustness, and functionality** in veterinary clinics. Thanks to the **electric height adjustment**, the table can be quickly adapted to operational needs, improving staff ergonomics and animal safety.

The stainless steel **worktop** is equipped with **two drainage holes** (Ø 2 cm) for liquid collection and comes with **two bowls mounted on brackets** positioned under the top, practical during outpatient procedures. The **long sides** are equipped with **ergonomic handles**, while the **rails at the ends** allow the installation of **additional accessories**, increasing the versatility of the station.

The **base is equipped with 4 swivel wheels with brakes**, which allow for smooth movement and secure locking during use. The **padded mattress**, covered with resistant material, and the **non-slip mat** offer the animal a comfortable and safe surface. The two elements can be used **interchangeably** based on the type of treatment.

The **flat-top version** is also available, without holes and without bowls, suitable for those who need a completely smooth surface. In this case, the equipment includes a mattress with **fastening straps** and an IV pole with two hooks.

The table supports a **maximum load of 150 kg** and is therefore suitable for all types of pets or working animals. The entire stainless steel structure guarantees **corrosion resistance**, durability, and **ease of cleaning**, fundamental elements for the veterinary medical sector.

Choose quality and reliability for your clinic: buy the **H930_73 stainless steel veterinary table** now, or request a custom quote for your facility.

FAQ:

1. **Is the table suitable for veterinary clinics with high workflow?**
Yes, thanks to the stainless steel structure and the capacity up to 150 kg, it is perfect for intensive use.
2. **Is it possible to order the table without holes and without bowls?**
Yes, the version with a flat top is available upon request and following a quote, more suitable for certain types of interventions.
3. **Can both the mattress and the mat be used?**
Yes, they are interchangeable based on the needs of the visit or treatment.
4. **Are the wheels lockable?**
Yes, all four swivel wheels are equipped with brakes to ensure maximum safety.
5. **How is the height adjusted?**
The adjustment is electric, smooth, and silent.

Mini buying guide:

To choose the right veterinary table, it is important to evaluate **materials, functionality, and operational flexibility**.

The H930_73 model, thanks to its **entirely stainless steel structure**, guarantees maximum hygiene, resistance, and durability over time.

The **electric height adjustment**, the presence of **included accessories**, and the possibility of choosing **between a top with drainage or a flat top** make it a complete solution for every clinical need.

It is ideal for environments where efficiency, cleanliness, and patient management are priority aspects.
