

Stainless steel washbasin on cabinet h956_12

AISI 304 stainless steel washbasin with hinged door cabinet, knee control, spout and telescopic feet. Dimensions: approx. W 40 x D 40 x H 90 cm.

The **stainless steel washbasin on cabinet for professional kitchens h956_12** is a practical and functional solution for environments requiring high hygiene standards, such as restaurants, canteens, and food laboratories. Made of **AISI 304 stainless steel**, this washbasin guarantees corrosion resistance and long durability, even under conditions of frequent use and in high humidity environments. Stainless steel is also easy to clean and maintains a professional appearance over time, ensuring constant hygiene.

Equipped with a **knee control**, the washbasin allows for water activation without the use of hands, minimizing the risk of cross-contamination and improving hygienic safety. The set includes a **spout**, a **drain**, and a **PVC siphon**, offering a complete system ready for installation. The **cabinet with hinged door**, mounted on **removable hinges** to facilitate opening and maintenance, allows easy access to internal spaces and plumbing connections, which are simplified thanks to the **open back**.

The **stainless steel telescopic feet**, recessed at the back to facilitate the floor cove, guarantee stability and allow height adjustment to adapt to irregular floors, improving the ergonomics for the user. These details ensure that the washbasin integrates perfectly into professional kitchens, where functionality and practicality are essential.

Get the maximum hygiene and practicality in your kitchen with the **stainless steel washbasin on cabinet h956_12**. Order now for a reliable and versatile product, designed to meet the needs of professional kitchens!

- **Improved hygiene** with knee control, preventing cross-contamination
- **Easy access** for maintenance thanks to the hinged door and open back
- **Stability and adaptability** with adjustable feet for uneven floors
- **Compact design** ideal for limited spaces, maintaining optimal functionality

FAQ:

1. **Is the washbasin difficult to install?**

No, thanks to the open back of the cabinet, plumbing connections are easily accessible and simplified.

2. **What materials are used for the accessories?**

The spout, drain, and siphon are made of PVC for effective waste management.

3. **Are the feet adjustable?**

Yes, the stainless steel telescopic feet can be adjusted to adapt to uneven floors and ensure the stability of the unit.

Mini buying guide:

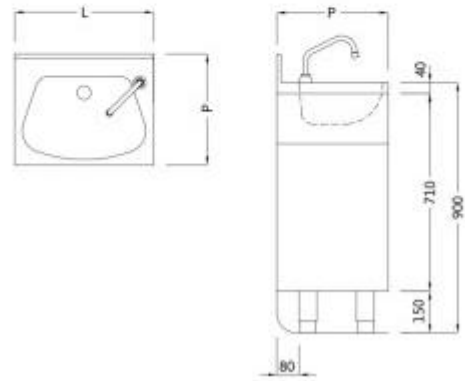

Choosing a **washbasin on cabinet for professional kitchens** requires attention to features that guarantee hygiene, practicality, and durability. A model in **AISI 304 stainless steel** is the best option for corrosion resistance and ease of cleaning. Ensure that the washbasin has a **knee control**, essential for maintaining high hygiene standards and preventing cross-contamination. The **cabinet with hinged door** and **open back** facilitate access for maintenance, while **telescopic feet** allow for height adjustment and improve stability on uneven floors. Check the dimensions to ensure the washbasin fits perfectly into the available space in your kitchen.
