

Stainless steel waste bin for professional kitchens h982_02

Professional waste bin in AISI 304 stainless steel, 700x600 mm, with top hole and front door for hygienic waste management. The **h982_02 stainless steel waste bin** is a technical solution designed for optimized waste management in environments with high hygiene requirements. Made entirely of **AISI 304 18/10 stainless steel**, it guarantees high corrosion resistance and superior durability even in intensive operational contexts such as industrial kitchens, laboratories, and healthcare departments.

The design focuses on operational functionality: the **top hole with rubber ring** allows for immediate waste disposal reducing surface contacts, while the **front door** ensures ergonomic access for emptying and bag replacement operations. The structure rests on 40x40 mm square tube legs, providing maximum stability to the module.

Technical characteristics

- **Material:** AISI 304 18/10 stainless steel with professional finish
- **Total dimensions:** L 700 x D 600 x h 850 mm
- **Disposal system:** Top hole with anti-splash rubber protection
- **Accessibility:** Front door with reinforced hinges
- **Structure:** 40x40 mm square tube legs
- **Compatibility:** Bins with a maximum diameter of 500 mm
- **Recommended capacity:** 50-liter bags
- **Configuration:** Supplied fully assembled
