

## Stainless steel waste bin h215\_199

201 stainless steel 90L waste bin with removable lid, 4 Ø75mm wheels and side handles for professional kitchens.

The stainless steel waste bin is the standard solution for waste management in professional kitchens, restaurants, hotels, and hospitality facilities. Designed for high-frequency use environments, it meets the need to contain organic and inorganic waste while maintaining optimal hygienic conditions and facilitating emptying and transport operations.

The product is made of **201 stainless steel with a thickness of 0.8 mm**, ensuring structural durability and compliance with hygiene and health regulations for professional kitchens. The equipment including a **removable lid, 4 wheels with a diameter of 75 mm, and side handles** allows for mobility even under full load and facilitates emptying operations without excessive physical strain.

## Technical features

- **Material:** 201 stainless steel
- **Thickness:** 0.8 mm
- **Capacity:** 90 liters
- **Lid:** removable
- **Wheels:** 4 wheels Ø 75 mm
- **Handles:** side
- **Dimensions:** Ø 450 x H 700 mm
- **Weight:** approximately 8–9 kg
