

Stainless steel waste separation bin h413_80

110-liter rectangular stainless steel bin with pedal lid and front opening, equipped with a wheeled trolley and bilingual pictogram for waste separation in HoReCa environments.

This **110-liter rectangular bin** in **stainless steel** is designed for high-traffic environments such as hotels, bars, and restaurants, where **waste separation** management represents an essential operational requirement. The structure combines hygiene, practicality, and durability in a single component.

The **pedal lid** allows for contact-free opening, reducing the risk of contamination, while the **front door opening** simplifies emptying and bag replacement. The **handle**, **pedal**, and **wheeled trolley** are made of **black painted tubular metal**, ensuring robustness and a professional appearance. The **wheels** facilitate movement even in tight spaces.

Each unit is supplied with **1 bilingual pictogram (Italian-English)** identifying the type of waste. During the ordering process, it is necessary to specify the desired category (paper, plastic, general, glass).
