

## Stair climbing transport chair h687\_68

Steel stair climbing chair for emergency evacuation. Equipped with descent tracks and telescopic handles. Capacity 150 kg. Medical Device.

The **stair climbing chair** is a medical device specifically designed for managing the evacuation of patients and people with reduced mobility in emergency contexts. The structure is engineered to tackle paths with stairs and steps, ensuring maximum safety for both the user and the transport personnel. Thanks to the integration of **gliding tracks**, the system actively assists the descent, minimizing friction and drastically reducing the physical effort required from the operator.

Handling is made versatile by the presence of **rear handles** and **front telescopic handles**, an optimal configuration to facilitate ascent operations. Patient comfort is ensured by an **integrated footrest** and a **movable headrest sheet**, adjustable to adapt to different anatomical heights. The wheel system features four support points: the front ones are swivel and equipped with a brake for safe parking, while the rear ones have an increased diameter to increase smoothness on flat and irregular surfaces.

## Technical characteristics

- **Maximum capacity:** 150 kg
- **Device weight:** 14.2 kg
- **Frame material:** Painted steel (yellow color)
- **Sheet material:** High-resistance PVC
- **Length with handles open:** 1450 ± 10 mm
- **Length with handles closed:** 1110 ± 10 mm

- **Depth:** 550 ± 10 mm
- **Height with handle extended:** 1600 ± 10 mm
- **Height with handle closed:** 1070 ± 10 mm
- **Folded thickness:** 330 ± 10 mm
- **Front wheels:** Swivel Ø 100 mm with parking brakes
- **Rear wheels:** Ø 200 mm for high smoothness
- **Assistance systems:** Assisted descent tracks, telescopic front handles, rear handles
- **Included accessories:** Footrest, movable headrest, 2 black safety belts
- **Regulatory compliance:** Class I Medical Device compliant with EU Regulation 2017/745
- **CND Classification:** V0899
