

Steel and wood workbench L.200 cm 5 drawers h870_14

Professional workbench 2000x800 mm in steel and 40 mm beech multiplex wood, with 5-drawer cabinet and floor fixing preparation.

The **professional workbench** represents an ergonomic and robust solution for the organization of workshops, warehouses and industrial production departments. Designed to withstand intensive mechanical stress, it integrates a large work surface in **40 mm beech multiplex wood**, obtained by layering peeled veneers that provide superior structural stability compared to traditional solid wood. The configuration includes an **integrated 5-drawer cabinet**, ideal for the systematic classification of small parts and heavy equipment, keeping the work area clear and functional.

Technical features

- **Total dimensions:** L. 2000 x D. 800 x H. 890 mm.
- **Worktop:** Beech multiplex wood, thickness 40 mm.
- **Supporting structure:** Powder-coated steel sheet with support equipped with perforated base plates for stable floor fixing.
- **Drawer cabinet:** Monobloc with 5 drawers with differentiated heights (50 mm, 100 mm, 100 mm, 200 mm, 300 mm).
- **Load capacity:** Certified capacity of 75 kg per single drawer.
- **Configuration:** Upper profile with 6 slots for secure top fixing.
- **Customization:** Metal components available in RAL colors to be defined during the order phase (standard color chart; extra on quote).
