

Steel bench for public spaces h350_83

Steel bench for public places in steel h350_83

Dimensions in cm : L200x D68 x H72

The proposed model is entirely made of steel, which ensures durability and resistance over time and against atmospheric agents. Both the sheet metal and the tubular parts of this bench are made of steel, and both undergo a very long treatment process that goes from galvanizing to painting in an oven with final natural drying. It is possible to select different variants from the drop-down menu: micaceous gray, corten painting, and the latter has a micaceous gray base with a seat and backrest in a corten finish. The design of the bench is so pleasant that it is also suitable for private areas such as apartment buildings or villas.

Technical features:

- Structure with sheet metal and steel tubulars
- Galvanizing and oven painting
- Available in different finishes: L.200 x D.68 x h.72 cm
- Seat height: 40 cm
