Steel corner protection h972_55

Yellow painted steel corner bumper, perfect for protecting edges and pillars in industrial environments. Dimensions: W. 150 x D. 150 x h 400 mm.

The **h972_55 steel corner protection** is designed to ensure maximum safety in industrial, logistical, and commercial environments. Ideal for **protecting sharp edges, structural corners, and pillars**, this barrier is an excellent choice for preventing accidental damage from forklifts, lift trucks, and other handling equipment.

Made of **high-resistance steel** with a thickness of **10 mm**, this protection is built to last over time even under intensive use. The **yellow painting** increases visibility and allows for preventive signaling of hazards, helping to improve personnel safety.

The **compact dimensions** (150 x 150 mm base and 400 mm height) make it suitable for narrow spaces without compromising protective capacity. It is ideal for warehouses, sheds, loading and unloading areas, and production plants.

Buy the h972_55 corner protection now to increase the safety of your industrial infrastructure. Contact us for multiple supplies or customizations.

Technical features:

- **Material:** Steel
- **Color:** High-visibility yellow
- **Dimensions:** W 150 x D 150 x h 400 mm
- **Material thickness:** 10 mm
- **Weight:** 10.50 kg
- **Assembly:** Floor mounted

User benefits:

- **Effective protection:** of corners, walls, and columns.
- **Extreme resistance:** to impacts from trucks or heavy vehicles.
- **High visibility:** thanks to the yellow paint.
- **Long durability:** even in high-traffic environments.
- **Easy installation:** on paved surfaces.

FAQ:

1. What is the main function of the corner protection?
The protection serves to prevent structural damage and accidents by protecting corners, pillars, and edges in high-movement environments such as warehouses and production areas.

2. Is it resistant to violent impacts?
Yes, thanks to the 10 mm steel material, it offers excellent protection against accidental impacts.

3. Is the paint durable?
Yes, the yellow coating is designed to ensure visibility and durability even in difficult conditions.

4. Is this protection also suitable for outdoor use?
Yes, thanks to the powder coating treatment, it can also be used in covered or partially exposed outdoor environments.

5. What are the overall dimensions of the product?
The bumper measures 150 x 150 mm at the base and has a height of 400 mm.

Mini buying guide:

When it comes to ensuring the safety of **structural corners, edges, and pillars** within warehouses, production plants, logistical areas, or industrial parking lots, it is fundamental to choose a **protection made with robust materials** suitable for environments subject to frequent impacts.

The **h972_55 corner protection** is made of **solid 10 mm steel**, one of the most resistant solutions on the market, capable of **absorbing violent impacts from forklifts, lift trucks, and heavy vehicles**, avoiding structural damage to columns or walls and reducing maintenance costs.

The **yellow color** guarantees **high visibility** and helps prevent accidental impacts, also becoming a **visual signaling element**.

Investing in quality corner protections like the **h972_55** means **preventing structural damage**, **improving safety at work**, and **reducing the risk of accidents**, in compliance with company safety regulations.

If you need to protect an entire plant, contact us for a **personalized consultation** and discover the solutions best suited to your project.
