

Steel crate trolley h2200127

Professional AISI 304 stainless steel crate trolley, 60x100 cm platform, 200 kg capacity. Hygienic structure ideal for HoReCa and warehouses.

This **professional trolley** has been designed for the manual handling of heavy loads and bulky packages in environments requiring high standards of hygiene and corrosion resistance. Thanks to the robust **AISI 304 stainless steel** structure, it represents a reliable solution for optimizing logistical flows within warehouses, food laboratories, professional kitchens, and retail outlets.

The solid sheet metal loading platform ensures stability even for small packages, while the certified load capacity of **200 kg** allows for the easy management of heavy loads in total operational safety.
