

Steel cylinder holder for 5/10 L cylinder h705_08

Medical trolley for 5/10 L oxygen cylinders, powder-coated steel, 5 lockable double wheels, ergonomic handle, CE certified.

The oxygen cylinder trolley is a medical device designed for the safe and efficient transport of 5 and 10 L oxygen cylinders within hospital and clinical environments. The **partially welded steel structure with RAL 9002 powder coating** ensures resistance and durability in the healthcare context. The design combines operational practicality and regulatory compliance, addressing the need for rapid and controlled movement of cylinders during daily clinical activities.

Technical features

- Material: steel with RAL 9002 powder coating
- Curved and ergonomic handle
- Welded cylinder holder ring, diameter 150 mm
- Compatibility: 5 L and 10 L cylinders
- 5 high-quality plastic double wheels, diameter 65 mm
- 2 lockable wheels for stability in position
- Fixed mounting prisms with dedicated safety straps for each cylinder capacity
- CE certified
