

Steel design planter h330_40

Design planter in galvanized and painted steel, with laser-cut structure. Pot available in different colors. External color: anthracite grey RAL 7016. Dimensions: W. 1490 x D. 500 x H. 400 mm.

The **h330_40 planter** represents a contemporary solution for urban furniture, designed to **combine elegance and robustness**. Its refined design, combined with the quality of the materials, makes it perfect for public, residential, and corporate contexts.

The **external structure** is made of **galvanized and painted steel**, laser-cut and bent, with a finish in **anthracite grey RAL 7016**. At the base, **16 mm diameter holes** allow for **secure anchoring to the ground**, ensuring stability even in highly frequented or exposed areas.

The **container element** is also made of **galvanized steel**, bent and inserted inside the external structure. The fastening between components is done via **AISI 304 stainless steel screws**, a guarantee of strength and durability over time.

The **internal load-bearing structure is available in various colors**, to adapt to different contexts. The color of the external structure can also vary, choosing from different colors, **on request and subject to a quote**.

A combination of **technical functionality and aesthetic impact**, perfect for next-generation urban furniture.

Make your public or corporate spaces unique with the **h330_40 planter**, elegant, resistant, and with an architectural design.

- **Durable materials:** structure entirely in galvanized and painted steel.
- **Secure anchoring:** base prepared with holes for ground anchoring.
- **Robust structure:** significant weight and solid construction ensuring reliability even in exposed environments.
- **Durability over time:** AISI 304 stainless steel joining elements.

FAQ:

1. **Is this planter suitable for environments exposed to wind?**
Yes, thanks to the robust structure and ground fixing, it ensures great stability.
2. **Is it possible to change the color of the external structure?**
Yes, on request and subject to a quote, it is also available in other colors.

3. Does it require frequent maintenance?

No, the materials used are corrosion-resistant and only require periodic cleaning.

4. Is the internal container removable?

No, it is fixed to the structure and is designed to hold plants stably and securely.

5. Is it also suitable for corporate or private environments?

Yes, it integrates perfectly into corporate, condominium, and prestigious residential spaces.

Mini buying guide:

The **h330_40 planter** is the ideal choice for urban and private furniture projects that require a contemporary aesthetic combined with **resistance and functionality**.

The **galvanized and painted steel structure**, combined with the matching internal container, guarantees **solidity and durability over time**. Thanks to the **range of colors** and the **stable fixing system**, it is perfect for installations in public spaces, urban green areas, corporate or residential entrances.

Steel urban design planter, planter with ground fixing, modern laser-cut planter, anthracite grey RAL 7016 planter, galvanized painted steel planter, planter for elegant public spaces.
