

Steel fountain for street furniture h109123

Outdoor fountain in galvanized and painted steel (220x150x1008 mm) with cast iron gully and anti-waste timed push-button tap. This **outdoor fountain** is designed to provide a robust and durable water point in public and private contexts. The supporting structure is made of **square-section tubular steel**, a technical choice that ensures high structural rigidity. The system is designed to simplify management operations: the upper part is equipped with an **inspectable steel cap**, fixed with screws, which allows immediate access to the tap for maintenance or replacement without dismantling the entire column. Protection against atmospheric agents is guaranteed by a **galvanization** treatment followed by thermosetting polyester powder coating, which prevents oxidation in the long term.

Technical features

- **Fountain column dimensions:** W. 220 x D. 150 x H. 1008 mm
- **Total depth (column + gully):** 677 mm
- **Structure material:** Galvanized steel painted with thermosetting polyester powders
- **Column section:** Square tubular
- **Standard color:** Anthracite
- **Taps:** Nickel-plated brass with front button and return spring (normally closed)
- **Internal components:** Stainless steel piping with 1/2" threaded terminal
- **Drainage system:** Painted cast iron gully with frame and removable grid for cleaning
- **Fixing:** Square base plate with 4 holes prepared for bolting to the ground
- **Maintenance:** Removable top cap for quick access to hydraulic fittings

Options and customizations

- Colors available on request: Corten, Grey RAL 7016, Grey RAL 9006, Red RAL 3000, Green RAL 6005.
