

## Steel medical stool for doctor's office h449\_177

Technical stool with padded backrest and seat, steel structure. Dimensions: D 63 x H from 101 to 127 cm.

The **technical stool H449\_177** is designed for use in **medical offices, clinics, and laboratories**, where comfort, hygiene, and practicality are required for moderate use up to 6 hours per day.

The **steel structure**, solid and durable, is completed by a **padded seat and backrest**, covered in **PPL** and made with **quality internal materials**, including **multilayer beech and high-density T-foam**. The compact shape (size M) and adjustable height make this stool ideal for healthcare professionals who need a comfortable but manageable seat.

The **integrated footrest** improves ergonomics, while the **gas mechanism (TUV certified)** allows for smooth height adjustment of the seat (from 65 to 90 cm). The **permanent contact system** allows for adjustment of the **backrest in both height and depth**, offering support to the lumbar area even during movement.

Equipped with **nylon wheels Ø 50 mm** and a stable base with a 63 cm diameter, the stool moves easily without compromising balance. Available in **various colors**, it can be customized to fit the aesthetics of the environment. **Armrests are not included**, but available as an option.

Order the **medical stool H449\_177** to ensure comfort and functionality in your clinic. Contact us to receive a personalized quote or to add optional armrests.

- **Pair of armrests:** height-adjustable

#### User benefits:

- **Support:** personalized lumbar support thanks to the adjustable backrest.
- **Footrest:** integrated for greater comfort and stability.
- **Materials:** durable, hygienic, and easy to clean.
- **Mobility:** smooth movement thanks to the nylon wheels.
- **Adjustment:** quick and safe height adjustment with certified gas piston.

#### FAQ:

1. **Is it suitable for continuous use throughout the day?**

The stool is recommended for moderate use up to 6 hours per day. For more intensive use, a model with a higher weight capacity is recommended.

2. **Is the product height-adjustable?**

Yes, via a TUV certified gas mechanism. The seat can be adjusted from 65 to 90 cm.

3. **Can the backrest be adjusted?**

Yes, the backrest is adjustable in both height and depth and features a permanent contact system.

4. **Is it possible to add armrests?**

Yes, armrests are available as options.

5. **In which colors is it available?**

The model is available in various colors. Options can be requested at the time of order.

#### Mini buying guide:

When choosing a seat for healthcare environments, it is essential to evaluate **ergonomics**, especially if the staff remains seated for several hours a day.

For moderate use (6 hours), as in the case of the H449\_177 stool, it is important that the seat is **comfortable, adjustable, and made of hygienic materials**.

The **presence of a footrest**, combined with **backrest adjustment**, helps prevent lumbar fatigue.

It is also fundamental to choose models with a **solid structure** (such as steel), and high-quality wheels to facilitate movement without compromising stability.

Finally, the availability of **options like armrests** and the **possibility to customize colors** are practical advantages for creating a functional and coordinated environment.
