

Steel parking barrier h28003

48 mm galvanized steel parking barrier, 54 mm telescopic foot, Euro cylinder lock, quick installation.

Parking barrier designed to restrict and precisely manage access to parking areas or paths, ensuring effective control of vehicular and pedestrian flow. Made of **hot-dip galvanized steel tube**, it ensures high structural resistance and durability over time, even in environments exposed to atmospheric agents. The **Euro cylinder lock with piston barrel** allows for controlled opening and closing, while the **telescopic central foot** guarantees stability and ease of installation. Automatic locking in the raised position reduces operating times and simplifies daily management.

Technical specifications

- Material: **hot-dip galvanized steel**
- Color: silver
- Overall dimensions: W.850 × D.318 × H.455 mm
- Main tube diameter: **48 mm**
- Central foot diameter: **54 mm** (telescopic)
- Locking: **Euro cylinder lock with piston barrel**
- Fixing: 3 fixing bases with U-sealing
- Operation: automatic locking in the raised position
