

Steel parking bollard h32808

Electro-galvanized steel parking bollard with fiberglass nylon protective collar. Automatic locking, European cylinder. 790×500 mm. TÜV certified.

Parking protection device specifically designed for condominiums and private areas closed to public transit. The barrier combines **electro-galvanized steel pipes** with a **fiberglass-reinforced polyamide protective collar**, ensuring mechanical resistance and durability over time. The system is equipped with **automatic locking upon manual return to the vertical position**, reducing operating times and improving daily practicality.

Technical features

- Material: steel pipes
- Anti-corrosion treatment: electro-galvanized
- Locking system: European profile cylinder
- Fixing: galvanized screws and nylon wall plugs
- Protective collar: fiberglass-reinforced polyamide (nylon)
- Positioning: locking possible in both vertical and lowered positions
- Dimensions: L 790 × h 500 mm
- Certification: **TÜV**
