

Steel pedestrian barrier h287_134

Boundary barrier with tubular steel posts and decorative elements in cast steel and forged steel. Dimensions: W200 x H120 cm

Pedestrian barrier ideal for delimiting private areas, public spaces, avenues. Composed of **2 galvanized tubular steel posts 40 x 40 mm** featuring a **sphere-shaped decorative element in cast steel** at the end. Internally it is characterized by a **double cross in galvanized tubular steel** with a **floral decorative element in forged steel** in the center. Structure **to be buried 20 cm** into the ground. The finishes are in **galvanized steel** and undergo a **pre-treatment process for degreasing impurities** through solutions and vapors, subsequently dried and painted by coating the pieces **with non-toxic powders** and finally subjected to **oven polymerization** to allow the powder to solidify.

Technical characteristics:

- Dimensions: W200 x H120 cm
- Material: galvanized steel
- Fixing: to be buried

Upon request and after a quote also available in the version to be bolted down

**The image is purely indicative as it refers to the version to be bolted down*
