

Steel pedestrian barrier h867_07

Painted steel pedestrian barrier 1500x900 mm, with internal flat reinforcement, ideal for delimitation in historic centers and LTZ areas.

The **pedestrian barrier** is an element of urban furniture designed for the secure delimitation of pedestrian areas and the management of vehicle flows in city contexts. Made with a **steel tubular** support structure, it integrates an internal flat profile reinforcement that increases its stability and overall mechanical resistance. The surface treatment with **powder coating** in anthracite shade ensures a discreet and professional aesthetic integration, making it suitable for installation in historic centers and limited traffic zones (LTZ).

Technical features

- Material: Structural steel
- Support structure: Round tube 40 x 40 x 2 mm
- Internal reinforcement: Steel flat profile with 8 mm thickness
- Finish: Weather-resistant powder coating
- Color: Anthracite
- Dimensions: 1500 x 40 x H 900 mm
- Weight: 16 kg
