

Pedestrian safety barrier in steel h287_127

Pedestrian safety barrier for urban furniture in round galvanized steel tube. Dimensions: L100 x H120 cm

Delimitation barrier for urban furniture ideal for enclosing pedestrian areas, cycle paths, public spaces. With a **round galvanized steel tube structure with a 60 mm diameter** and a central crossbar also made of steel. Fixing is carried out via **20 cm underground embedding**. The steel parts undergo a **pre-treatment process for degreasing impurities** through solutions and vapors; they are then dried and painted, coating the pieces **with non-toxic powders** according to current regulations; finally, they undergo **oven polymerization** to allow the powder to solidify.

Technical features:

- Dimensions: L100 x H120 cm
- Material: galvanized steel
- Fixing: to be embedded 20 cm deep

INFORMATION

- Length in millimetres 1000.000000
- Height in millimetres 1200.000000
- fixing da interrare
