

Steel pharmacy trolley h1354

Drug distribution trolley with **15 dividers with 3 compartments, 45 total spaces**. Structure in **painted steel**

Healthcare trolley for drug distribution that allows managing daily or weekly patient treatments. In other words, a sort of portable pharmacy with perfect internal division for storing medications in an orderly and precise manner.

The material used, steel and technopolymer, makes it lightweight, maneuverable, and practical to use.

The trolley can be completely closed with a security lock. Manufactured in compliance with specific product UNI regulations and in particular compliant with Legislative Decree 626/94 art 6 (implementation of EC directives regarding the improvement of safety and health in the workplace).

Does not require CE marking because it does not fall within the scope of the "Medical Devices Directive" 93/42/EEC

The **top part** consists of a large support surface in technopolymer, a plastic material, made in low relief without sharp edges to make cleaning and disinfection easier.

The **front part** is instead for inserting drawers, also in technopolymers, without sharp edges and with a rounded interior. The sliding of the drawers is silent thanks to the use of ball-bearing guides, equipped with a stop.

The **left side** includes an additional pull-out work surface in technopolymer, a built-in compartment complete with four small shelves with a front panel all in technopolymer

The **right side** consists of a built-in compartment in technopolymer, 1 waste container, 1 catheter holder, 1 small shelf with front panel

Technical features:

- self-supporting and monocoque structure
- 15 dividers with 3 compartments for a total of 45 spaces
- painted steel structure
- technopolymer surface and side panels
- ergonomic push handle
- centralized key lock
- perimeter bumper integrated into the base of the trolley
- equipped with 4 wheels diameter 125 mm, two with brake
- Italian production

Standard drawers:

- 1 module 1 drawer, dimensions 450x475x137H, made entirely of technopolymer
- 5 drawers, dimensions 450x475x105H, for drug containment, made of painted steel sheet with technopolymer front panel containing no. 3 self-extinguishing plastic containers (90x460x90H mm) complete with three-sector transparent separators (75x135x90H mm each sector)

INFORMATION

- Number of compartments 45
- Length in millimetres 670.000000

- Depth in millimetres 640.000000
- Height in millimetres 1000.000000
