

Steel planter for public spaces h287_175

Urban furniture planter color anthracite grey. Dimensions: 65x65xh.70 cm.

Urban furniture planter with an attractive design and simple decoration, composed of 4 galvanized round steel tube uprights Ø 60 mm with a spherical decorative element (pine cone upon request) at the top, made of hot-forged iron. **Outer frame** made of tubular galvanized steel of various sections and **crossbrace** equipped with a stamped steel flower. Hot-dip galvanized steel sheet container, thickness 20/10. **Hot-forged steel bases**. Threaded bars are available as an alternative to these for a more secure anchoring to the ground. Hot-dip galvanizing: At the end of the production process, the internal container undergoes a hot-dip galvanizing process according to **UNI EN ISO 1461** standards by immersion in a bath of hyper-pure molten zinc. Painting: The galvanized steel parts first undergo a degreasing pre-treatment process to remove impurities using vapor solutions, then are dried and subjected to painting operations using electrostatic guns that cover the pieces with powder paint in a flouxy state. Subsequently, the product is subjected to polymerization in an oven, a process that allows the powder to solidify by baking at a temperature of 180/200° C in a hot air circulation oven. The pieces coming out of the oven are cooled naturally. **The powders** used in the painting process are non-toxic according to current regulations. Ideal planter for embellishing parks, squares, and outdoor spaces, giving a touch of style to the environment.

Technical features:

- Material: galvanized steel
- Color: anthracite grey
- Dimensions: 65x65x70 cm
- Anchoring: flush to the ground

INFORMATION

- Length in millimeters 650.000000
- Depth in millimeters 650.000000
- Height in millimeters 700.000000
- shape square

Steel planter for public spaces h287_175

Length in millimeters: 407 mm

Depth in millimeters: 400 mm

Height in millimeters: 399 mm

Diameter: 575 mm

Shape: quadrata
