

Steel serving trolley h22054

Chrome-nickel steel serving trolley with 3 shelves, 920x600x945 mm, with deep tray for dirty dishes and 100 kg load capacity for professional catering.

The serving trolley **h22054** is a technical solution designed to optimize table service and clearing operations within professional kitchens and HoReCa contexts. The structure is entirely made of **chrome-nickel steel**, an alloy selected for its high mechanical resistance and the ability to maintain hygienic properties even in high-humidity environments or those subject to intensive use.

The **three-shelf** configuration is designed to maximize operational efficiency: the presence of a 100 mm deep tray allows for the safe transport of dirty dishes or containers, preventing the leakage of liquids or residues during movement. Mobility is guaranteed by four swivel wheels, two of which are equipped with a pedal locking system to ensure stability during loading and unloading phases.

Technical specifications

- **Material:** high-resistance chrome-nickel steel
- **Configuration:** 3 shelves in total
- **Technical compartment:** 1 shelf for dishes 100 mm deep (W.760 x D.440 mm)
- **External dimensions:** W.920 x D.600 x H.945 mm
- **Shelf dimensions:** W.830 x D.510 mm
- **Movement system:** 4 swivel wheels (2 with parking brake)
- **Maximum load capacity:** 100 Kg distributed
- **Operating weight:** 14.1 Kg
- **Distance between shelves:** upper 270 mm, lower 265 mm
- **Assembly:** quick assembly kit included
