5. What material is it made of and what color is it?

It is made of steel and is red in color.

Mini buying guide:

When choosing a workshop tool trolley, start with the load capacity: if you have to manage significant equipment, a capacity of up to **500 kg** is a decisive parameter. Then evaluate the organization: the presence of **drawers** is useful when you want to protect and separate tools and accessories, keeping the surface free and reducing clutter. Consider mobility: handle and wheels affect the practicality of movement, and a wheel diameter of **100 mm** helps make handling smoother. Finally, in professional environments, robustness is essential: a **steel** structure is consistent with intensive use and the need for stability over time.
