

Steel waste collector trolley h8622

Professional 110L waste collector trolley in UV-resistant painted steel with pedal and wheels. HACCP compliant for hygienic waste management.

The waste collector trolley **h8622** is a professional solution designed for the efficient and hygienic management of waste in high-traffic environments such as shopping centers, industrial complexes, and logistics facilities. The structure is entirely made of **UV-resistant powder-coated steel**, a treatment that ensures high mechanical resistance and protection against material aging. The opening system via a wide pedal meets the need to operate in total safety, avoiding manual contact with potentially contaminated surfaces.

Technical features

- **Material:** UV-resistant powder-coated steel
- **Capacity:** 110 Liters
- **Dimensions:** W.440 x D.530 x h.900 mm
- **Handling system:** smooth Ø 150 mm wheels and ergonomic push handle
- **Bag safety:** integrated perimeter bag-holder elastic
- **Opening:** reinforced pedal mechanism
- **Operating weight:** 10 Kg
- **Compliance:** HACCP protocol

Available options:

The lid is configurable in different color variants to facilitate waste sorting: Metallic grey, Ultramarine blue (RAL 5002), Moss green (RAL 6005), Yellow (RAL 1021), and Red (RAL 3020).
